## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Yuen et al (US 2005/0008333).

Regarding Claim 1, Yuen discloses a method of enabling to configure a device (FIG.1, 14) for enabling a user to select from among a plurality of sources that supply content, the method comprising:

determining the plurality of sources available to the user for operational use of the device (FIG.8; FIG.28, 622, 632; Para 111; programs from a program guide listing from a local cable provider);

determining respective representations of respective ones of the sources for being rendered at a user interface of the device (Para 122; when a channel is highlighted through a program guide); and

providing means for configuring the device so that user interaction with a specific one of the representations rendered causes the device to select a specific one of the sources associated with the specific representation (Para 122; when a program is selected the tuner then tunes to the corresponding channel).

Regarding Claim 2, Yuen further discloses the determining of the plurality of sources comprises determining respective identifiers, being local to the user, of respective ones of the plurality of the sources (FIG.28, 626, 630), and

Art Unit: 2426

the means is operative to associate the respective representations with the respective identifiers (FIG.28; a table to associate a broadcast channels with local channel numbers).

Regarding Claim 3, Yuen further discloses the means comprising a look-up table of association of the respective local identifiers and the respective representations (FIG.28).

Regarding Claim 4, Yuen further discloses the sources comprise a broadcast channel having a channel number as an associated one of the identifiers (FIG.28, 626, 630); and a corresponding one of the representations associated with the channel number comprises a logo or call sign of the channel (622,632; CBS, NBC are call signs).

Regarding Claim 5, Yuen further discloses the source comprising a broadcast channel having a channel number as an associated one of the identifiers (FIG.28, 624, 628); and a corresponding one of the representations associated with the channel number is indicative of semantics of the content broadcast on the channel (FIG.28, 622, WBBM or WMAQ is semantics of the content broadcast on the channel).

Regarding Claim 6, Yuen further discloses the determining of the plurality of sources comprising determining in which geographical area the user resides (Para 112; such as Los Angeles metropolitan area).

Regarding Claim 7, Yuen further discloses the determining of the plurality of resources comprising determining a content service provider of the user (Para 130; channel conversion based on each local cable carrier).

Art Unit: 2426
